

terrain

VERMONT FOUNTAIN

ASSEMBLY INSTRUCTIONS:

1. Make sure the pond is level to the ground, then put the motor pump close to the tube at the center.
2. Attach the motor pump to the spout fitting, then insert the electrical cable into the center tube. Pull the cable plug through to the edge of the pond.
3. Insert the dowel head at the top of the centerpiece.
4. Fill the pond with water, up to three-quarters of the level of the pond.
5. Plug in the electrical cable, then wait for water flow. Regulate or adjust the water flow through the PVC gate valve until desired flow is obtained.

All fittings included;

MOTOR PUMP SOLD SEPARATELY
